1. Custom Limoges Dinnerware by Atelier Soubiran - As product development becomes more and more mechanised, handmade items are as rare as they are desirable. A true-to-form artisan, Alix Soubiran, Creative Designer of Atelier Soubiran, uses her background as a fine artist to create elegant, tailor-made dinnerware for upscale clientele. As the design vision takes shape, the client is taken through every element of the creation process—no detail is left unturned. Patterns, images and color palettes are selected to best suit the aesthetic of the space as well as the personality of the client. Upon finalisation, it is sent to Limoges, France and pressed onto the world's most exquisite porcelain. **2. The Cloisters by SYLKA Carpets** - SYLKA's high-end floor coverings are a treat for any home or office. The luxurious carpets and rugs are made with NuSilk, a revolutionary fibre system that provides silk-like qualities and appearances but is significantly more hardwearing and easier to maintain. Unlike natural and faux silk luxury floor coverings, NuSilk is the only fibre system that will retain its beauty and feel after cleaning. For this reason, the hand-crafted carpets have been given commercial grading, meaning they are ideal for areas with high foot traffic, from high-end department stores to hotels, penthouses, super yachts, offices and corporate boardrooms. SYLKA's collections come in a range of designer friendly natural shades that will complement any living space and they can even be customised. This has made SYLKA carpets the go-to choice for some of the world's top interior designers. Kelly Hoppen of Kelly Hoppen Interiors, says of the luxury floor coverings "With the lustre of finest silk and a touch of softness, this unique carpet ticks all the boxes, from its good looks to its practicality." **3. Elements, by Croft** - a wonderful collection of contemporary door and cabinet furniture designs, suitable for high end residential and commercial projects. The collection consists of eleven stunning Lever Handle designs, now available in two lengths, choice of round and square Lever Roses, Escutcheons, Turn and Releases, Cylinder Covers and Cabinet furniture. **4. Real Bronze by Architectural Bronze Casements** - Architectural Bronze Casements is the leading luxury design company for producing hand-made, bespoke bronze windows, doors, screens, and secondary glazing. Their products are tailored to both traditional and contemporary architecture, as well as internal and external. The firm is the only company to offer double-glazed secondary glazing,
